Subject Index

A

Acetazolamide 32
Acetylcholine 38
– stimulation 26
Action potential(s) 1, 61, 90, 97, 106, 250, 313
– – duration 230
Adenosine 3,5-monophosphate (cAMP) 48
After-potential 274
Alerting reflex responses 12
Alkaline phosphatase 217
Amiloride 32, 287
4-Aminopyridine 230
Amphiuma kidney 55
Amygdala 12
Amylase secretion 26
Anaesthetics 12
Anemonia sulcata toxin II 313
Anions 279
Antidiuretic hormone 211
Antidromic field potential analysis 156
Apical membrane 287
ATPase activity 294
ATPase, Na-K- 113
ATP content 118
ATP deficiency 118
Atropine 186, 355
Autonomic asymmetry 139

B

Ba ions 256
Barium 78, 230, 287
Benzimidazolyl-2-guanidine (BIG) 287
Bird osmoregulation 222
Blood oxygen affinity 21
– viscosity 279
Bradycardic agent, AQA 39 97
Bradykinin 186
Brattleboro rats 211
Brushborder membrane 32
– – vesicles 217
α-Bungarotoxin 202

C

Ca^{2+}-activated tension 48
Ca^{2+} movements 118
Ca^{2+} uptake 48
Caffeine 338
Calcium 243, 338
– activated isometric force 174
– – potassium current 61
– channel block 97
– channels 61
– -dependent outward potassium current 70
– entry 70
– -free media 333
–, intracellular 26
–, –, cytoplasmic 264
– spikes 106
cAMP 48
cAMP-dependent protein kinase 48
Capillarity 124
Cardiac cells 150
– muscle 338
– Purkinje fibres 90, 230
Cardiovascular regulation 12
Casium 230
Cation channel(s) 287
Cationic substitution 38
C-cells 106
Cell membrane conductance 302
Cellular Ca^{2+} retention 118
– sodium activity 55
Cerebral artery 182
Cesium 94
Chemoreceptor reflex responses 12
Chloride fluxes 222
– –, colon 32
– transport 55
Choline-chloride replacement 222
Cholinesterase inhibitors 202
Cl^-/HCO_3^- antiports 32
Cobalt 1
Colon 222
Concentric and eccentric muscle contractions 16
Conductance 130
– of end-plate channels 38
Contractile response to K^+ 186
Contraction 347, 355
– in aorta 118
Convulsive activity 1
Cooling 313
Cortical thick ascending limb of Henle's loop 271
Coupling of urea and sodium 226
Current channels 94
Cytoplasmic calcium concentration 264
– proton concentration 264
Cytotoxin of pseudomonas aeruginosa 271

D

2D-cable analysis 302
Defence reaction 12
Dehydrated monkey 195
Dehydroepiandrosterone sulfate 279
Depolarization of cell membrane 144
Diabetes insipidus 211
Diet, low K 113
Diffusion distances muscle 124
Diltiazem 106
Diphosphoglyceric acids 21
Discharge frequency of motor axons 239
Distal amphibian nephron 55
– convoluted 113
Dorsal root afferents 1
– – entry (DRE) 156
2,3-DPG level 21
Drinking 195

E

Eccentric muscle contractions 16
Echinocytosis 279
Electrical activity of single ventricular cells 264
– decoupling 250
– impedance 302
– skin conductance 130
Electrochemical driving force 222
– gradient of sodium ions 55
Electrogenic sodium entry mechanism 32
Electronic Na pump 256
Electrophysiological mapping 156
End-plate channels 38
Epilepsy 1
Epileptogenic potency of CO^{2+}- 1
Epithelium 302
Erythrocyte(s) 21, 279
Exercise 16, 191
External K^+ 94

F

Fasting 191
Fast inward current 150
– and slow muscle fibres 202
Fat-rich meal 191
Fetus 21
Filtrate reabsorption 320
Force-length relation 174
Frog skin 226
Furosemide 32, 55

G

Gallbladder epithelium 302
Gentamicin 243
Glass microelectrodes 161
Glucosamine 38
Glucose 320
–, iso-osmotic 186
– transport 217

H

Heart muscle cells 150
Heat-stable inhibitor of cAMP-dependent protein kinase 48
Helix 70
Helix pomatia neurons 61
Hemoglobin 279
Hen colon 222
Hereditary diabetes insipidus 211
Histamine 186
Human red cells 279
Hydroxytryptamine 186
Hyperkalemia 165
Hypothalamus 12
Hypothyroid rats 294
Hypoxia 118

I

Ileocecal junction 347, 355

Subject Index

A

Acetazolamide 32
Acetylcholine 38
– stimulation 26
Action potential(s) 1, 61, 90, 97, 106, 250, 313
– – duration 230
Adenosine 3,5-monophosphate (cAMP) 48
After-potential 274
Alerting reflex responses 12
Alkaline phosphatase 217
Amiloride 32, 287
4-Aminopyridine 230
Amphiuma kidney 55
Amygdala 12
Amylase secretion 26
Anaesthetics 12
Anemonia sulcata toxin II 313
Anions 279
Antidiuretic hormone 211
Antidromic field potential analysis 156
Apical membrane 287
ATPase activity 294
ATPase, Na-K- 113
ATP content 118
ATP deficiency 118
Atropine 186, 355
Autonomic asymmetry 139

B

Ba ions 256
Barium 78, 230, 287
Benzimidazolyl-2-guanidine (BIG) 287
Bird osmoregulation 222
Blood oxygen affinity 21
– viscosity 279
Bradycardic agent, AQA 39 97
Bradykinin 186
Brattleboro rats 211
Brushborder membrane 32
– – vesicles 217
α-Bungarotoxin 202

C

Ca^{2+}-activated tension 48
Ca^{2+} movements 118
Ca^{2+} uptake 48
Caffeine 338
Calcium 243, 338
– activated isometric force 174
– – potassium current 61
– channel block 97
– channels 61
– -dependent outward potassium current 70
– entry 70
– -free media 333
–, intracellular 26
–, –, cytoplasmic 264
– spikes 106
cAMP 48
cAMP-dependent protein kinase 48
Capillarity 124
Cardiac cells 150
– muscle 338
– Purkinje fibres 90, 230
Cardiovascular regulation 12
Casium 230
Cation channel(s) 287
Cationic substitution 38
C-cells 106
Cell membrane conductance 302
Cellular Ca^{2+} retention 118
– sodium activity 55
Cerebral artery 182
Cesium 94
Chemoreceptor reflex responses 12
Chloride fluxes 222
– –, colon 32
– transport 55
Choline-chloride replacement 222
Cholinesterase inhibitors 202
Cl^-/HCO_3^- antiports 32
Cobalt 1
Colon 222
Concentric and eccentric muscle contractions 16
Conductance 130
– of end-plate channels 38
Contractile response to K^+ 186
Contraction 347, 355
– in aorta 118
Convulsive activity 1
Cooling 313
Cortical thick ascending limb of Henle's loop 271
Coupling of urea and sodium 226
Current channels 94
Cytoplasmic calcium concentration 264
– proton concentration 264
Cytotoxin of pseudomonas aeruginosa 271

D

2D-cable analysis 302
Defence reaction 12
Dehydrated monkey 195
Dehydroepiandrosterone sulfate 279
Depolarization of cell membrane 144
Diabetes insipidus 211
Diet, low K 113
Diffusion distances muscle 124
Diltiazem 106
Diphosphoglyceric acids 21
Discharge frequency of motor axons 239
Distal amphibian nephron 55
– convoluted 113
Dorsal root afferents 1
– – entry (DRE) 156
2,3-DPG level 21
Drinking 195

E

Eccentric muscle contractions 16
Echinocytosis 279
Electrical activity of single ventricular cells 264
– decoupling 250
– impedance 302
– skin conductance 130
Electrochemical driving force 222
– gradient of sodium ions 55
Electrogenic sodium entry mechanism 32
Electronic Na pump 256
Electrophysiological mapping 156
End-plate channels 38
Epilepsy 1
Epileptogenic potency of CO^{2+}- 1
Epithelium 302
Erythrocyte(s) 21, 279
Exercise 16, 191
External K^+ 94

F

Fasting 191
Fast inward current 150
– and slow muscle fibres 202
Fat-rich meal 191
Fetus 21
Filtrate reabsorption 320
Force-length relation 174
Frog skin 226
Furosemide 32, 55

G

Gallbladder epithelium 302
Gentamicin 243
Glass microelectrodes 161
Glucosamine 38
Glucose 320
–, iso-osmotic 186
– transport 217

H

Heart muscle cells 150
Heat-stable inhibitor of cAMP-dependent protein kinase 48
Helix 70
Helix pomatia neurons 61
Hemoglobin 279
Hen colon 222
Hereditary diabetes insipidus 211
Histamine 186
Human red cells 279
Hydroxytryptamine 186
Hyperkalemia 165
Hypothalamus 12
Hypothyroid rats 294
Hypoxia 118

I

Ileocecal junction 347, 355

Ileum 186
Indomethacin 347
Inferior vena cava 165
Inotropic effect 48
Intestinal smooth muscle 118
Intestine 222
Intracellular calcium 26
– H^+ 250
– microelectrodes 182
– microinjection 264
– potassium 161
– protons 264
– sodium 26
– – activity 55
– –, muscle 161
Inward current 150
Ion fluxes 32
– selective microelectrodes 161
Ionic channels 202
– current(s) 150, 230
Inophore A 23187 26
Ischemia 329
Isolated frog spinal cord 1
– plasma membrane 217
Isometric twitches 338
Isotonic afterloaded contractions 338
– fluid reabsorption 294

K

K activated Na pump 256
K outward current 78
K^+ conductance 182
K^+-induced tension 118
Ketamine anaesthesia 12
Kidney 271
– cortex 294
– function 217
–, Na-K-ATPase 113, 165
Lactate 329
Late after-potential 274
Lens potential 333
Limbic system 12
Load sensitivity 338
Long-duration depolarization 90
Loop of Henle 271
Lorentzian components 287
Low potassium diet 113

M

Mannitol 320
Maturation 124
Medullary Na-K-ATPase 165
– thick ascending limb 113
Membrane current(s) 78, 97, 230
– excitability 144
– fluidity 279
– permeability 26, 61
– potential 38, 182, 329, 333, 355
– proteins 279
Microelectrode(s) 161, 182, 347, 355
– technique 333
Micropuncture 320
Miniature end-plate currents (MEPCs) 38, 202
Mitochondria 118
Mitochondrial Ca^{2+} 118
Monkey 195
Morphometry 124
Motility of the intestine 347
Motoneurons 1
Motor axons 239
Muscle cells 182
– contraction speed 16
– fibre(s) 161, 202, 274
– force 16
– lipoprotein lipase activity 191
– tone 347
Myelinated nerve fibres 313
Myocardial contractility 48
– fibres 48
Myocardium 97, 250

N

NaCl transport 222
Na-channels 333
Na-K-ATPase 113, 165
Na^+-channel 287
Na^+ fluxes in frog skin 130
Na^+-free solution 106
Na^+ permeability 294
Na^+-K^+-ATPase activity 294
Na^+/K^+ maintenance compartment 130
Na^+ transport 130
Nasal mucosa 139
– vasomotor oscillations 139
Na sensitive microelectrode 256
Necturus 302
Nephron segments 113
Nerstian potential 182
Nerve endings 1
– fibres 313
– –, inhibitory 355
Neuro-effector transmission 355
Neuromuscular junction 38
Neurons 61, 94
Neurosecretion 195
Node of Ranvier 313
Nodose ganglion 106
Noise analysis 85, 287
Noradrenaline 355
Normoxia 118
Nystatin 287

O

O_2 diffusion distance 124
Ontogenesis of specific Na^+ transport 287
Organic calcium channel blockers 97
– channel inhibitors 97
Osmo regulation, bird 222
Osmotic effect of glucose 320
Ouabain 130
Outward current 243
– – channels 94
– potassium current 70
Oxygen 279
– affinity 21

P

Pacemaker currents 230
Pancreatic acinar secretion 26
Papillary muscle 243, 250, 338
– plasma flow 211
Paracellular conductance pathways 302
Patch-voltage-clamp method 150
P_{CO_2} 182
Permeability of lumen membrane 271
pH 182
pH intracellular 329
Phentolamine 355
Phloretin 226
Phlorizin 320
Phosphate transport 217
Piretanide 32
Postdenervation changes 161
Postischemic reflow 329
Postsynaptic currents 202
Potassium 274
– accumulation 274
– channels 61
– current 94, 70
– ions 186
– permeability 144
– -selective electrode 61
Potential dependency 202
Procaine 144
Propranolol 355
Prostaglandins 347
Proximal tubule 113, 294, 320
Pseudomonas aeruginosa toxin 271
Purkinje fibres 90, 256
– strands 230
Pyruvate kinase 21

R

Radioimmunoassay of PGs 347
Recruitment 239
Red cells 21, 279
Relaxation 355
– phase 338
Renal cortex 217
– function 165
– oxygen consumption 320
Renshaw cells 239
Respiratory activity 139
– rhythm 139
Rubidium efflux, smooth muscle 144

S

Sarcoplasmic reticulum 48
Scatchard plot 144
Sea anemone toxin II 313
Short-circuit current 130, 287

Short-circuited colon 32
Shunt path 302
Single channel conductance 85
– rat heart muscle cells 150
– ventricular cells 264
Sinoatrial node 78, 85
Sinus node tissue 78
Skeletal muscle 329
– – fibres 274
– – lipoprotein lipase 191
Skin of the larval frog 287
Skinned fibres 174
– myocardial fibres 48
Slow inward calcium current 97
– – channel 85
– – current 78, 85, 243, 264
– muscle fibres 202
Smooth muscle 118, 144, 355
– – cells 347
– – mechanics 174
Sodium, active transport 226
– channels 313
– chloride transport 55
– concentration 186
– fluxes, colon 32
–, intracellular 26
Sphincter 355
Spike reflection 1
Spinal cord 1, 156
Spreading depression 1
Square wave pulse analysis 302
Statistical analysis 150
Stiffness 174
Strontium 250, 338
Sucrose gap 250
Supraoptic neurosecretory neurons 195
Suprarenal ligation 165
Sympathetic discharge 139
– nuclei 156
– oscillators 139

T

Tadpole skin 287
Tension 338
Tetanus 274
Tetraethylammonium 287, 313
Tetrodotoxin 106, 333
Theophylline 32
Thirst 195
Thyroid gland 294
Tight junction resistance 302
Time-dependent outward current 243
Tourniquet ischemia 329
Tracheal smooth muscle 144
Transepithelial Na^+ transport compartment 130
Transverse tubular system 274
Tri-iodothironine (T_3) 294
Tris 38
Tubular transport 217
– – processes 294
Two microelectrode voltage clamp 264

U

Urea absorption 226
Urine concentrating ability 211
– osmolality 211
Ussing chambers 222

V

Vascular smooth muscle 118, 174
Vasopressin release 195
Vena cava 165
Ventilation 16
Ventilatory response curve to CO_2 16
Ventral root fibres 1
Ventricular cells 264
– muscle 97, 243
Verapamil 106
Veratrine 333
Voltage activated potassium current 61
– clamp 61, 85, 94, 202, 230, 256, 264, 313
– – analysis 38

W

Water intake 195
White rami 156
